www.protechaudio.com

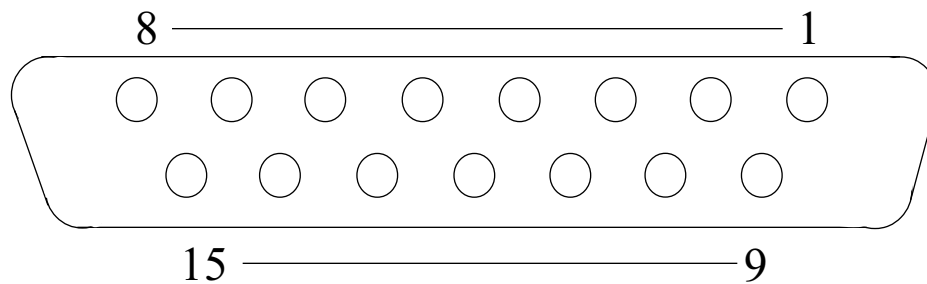

Designed to allow remote control of the Model 2000 and 2000-C Dugan Automixers. The model 2000-CON Remote Control Console allows adjustment of individual input gains, master output gains, and switch closures for muting or other functions.

Used in boardroom and courtroom systems the Model 2000-CON is designed to fit into small spaces and still allow multiple control functions without the need for expensive touch panels.

Some examples of functions are; individual level control of each input, the master output, system mute, pink noise activation (for courtroom systems) or chairman override for boardroom systems or video activation.

Custom labeling allows each unit to be tailored to your specific installation! Due to custom labeling, please allow 30 days for delivery
